

Following where nature LEED®s

When it comes to environmental impact, CertainTeed believes in leading by example.

We belong to the U.S. Green Building Council and champion their Leadership in Energy and Environmental Design (LEED) Green Building Rating System™. And we also strongly support the National Green Building Standards™ of the National Association of Home Builders.

Together, these standards and our unwavering commitment to high-performance products that offer beauty, comfort and a sense of assurance, allow you to be at home in a better world with CertainTeed Roofing.

CertainTeed Roofing

buildingresponsibly™

Nature had a great idea. We just made it better.

A natural innovator: CertainTeed.

Everyday, CertainTeed puts ideas into action
and green as our goal.

Roofing in harmony with nature.

It's more than a good idea at CertainTeed. It's a constant call to innovation.

Our building science follows where nature leads us, taking our inspiration from man and his environment.

We listen. We learn. And we innovate.

It's a sustainable lesson in responsible building and environmentally-sensitive development in an age of expediency.

At CertainTeed, we stand by our assurance that our processes, our products and our performance lead the industry in responsible choices for a better world.

We believe nature had a good idea. We're committed to making it better.

buildingresponsibly™

Recycling and the road to success.

We recycle nearly 90% of our production waste into asphalt materials for road construction.

Out with the bad air.

We reduce the CO₂ released from standard extraction and processing of virgin raw roofing materials by using recycled content.

Zero footprint in sight.

Our Landmark™ shingle production generates zero manufacturing waste.

Less in the landfill.

Our recycling commitment diverts over 250,000 tons of waste a year from landfills.

Bring nature back.

Our North Carolina facility, the world's largest roofing plant, has its own wetlands and a storm water management system where wildlife thrives.

Packaging smarts.

We integrate recycled content into packaging materials including corrugated rolls and Kraft paper.

Information all around.

We take our commitment to heart...all employees are trained on recycling and reuse.

Go low and slow on energy use.

Our low and steep slope roofing products reduce energy costs and CO₂ emissions.

Reflect away the rays.

Our CoolStar™ and XT™ 25 AR Star White products are ENERGY STAR® and Cool Roof Rating Council certified, and they reflect away the sun's rays, lowering rooftop and attic temperatures.

Use it (don't lose it).

We use recycled content including slag, stone granules, corrugated mixed paper and sludge, reducing landfill waste and carbon emissions.

The Vocabulary of Green

CO₂ Emissions

CO₂, or carbon dioxide, is released both naturally and as a byproduct of energy use to power our world. It is one of the identified "greenhouse gases" that can contribute to global warming. CertainTeed is working to reduce CO₂ emissions both directly in our manufacturing, and by offering a finished product that allows others to save energy.

Landfill

An excavated hole where waste is buried for disposal. CertainTeed is dedicated to eliminating as much refuse as possible that was formerly buried in our landscapes.

Zero Footprint

The effect of a neutral environmental impact on the earth based on a given activity. CertainTeed is striving toward zero waste in manufacturing.
